Summary of key business events and financial results of the CD PROJEKT Group in 2024

In 2024 the CD PROJEKT Group posted 985 million PLN in sales revenues, along with nearly 470 million PLN in net profit. The biggest contribution to these figures was from strong sales of CD PROJEKT RED games. By the end of 2024 *Cyberpunk 2077* had sold over 30 million copies, with sales of the *Phantom Liberty* expansion topping 8 million copies. Sales results in the reporting period were also affected by sales of *The Witcher 3: Wild Hunt* along with expansions, which, despite 10 years having elapsed since its release, continues to enjoy popularity among gamers around the world.

In 2024 the CD PROJEKT RED studio continued with its intensive development work on *The Witcher 4* – the initial installment in the new Witcher saga. In November 2024 work on the game progressed to full-scale production. In terms of business and marketing, the key highlight of the past year at CD PROJEKT was the global release of *The Witcher 4*'s first trailer, unveiled in December at The Game Awards gala in Los Angeles. The trailer revealed – for the first time – that the game would be played from the perspective of a new protagonist: Ciri. It was met with enthusiastic reception among gamers and gaming media alike.

2024 was also an active year for the Cyberpunk franchise. In December the Studio released another large update – 2.2 – which enriched the game with new content and introduced a range of technical and gameplay improvements. Our work on *Cyberpunk 2077* was recognized by gamers and market experts: in April 2024 the game received a prestigious BAFTA award for best post-release support on the part of the dev team, while in May 2024 its ratings on Steam, averaged over the past 30 days, crossed the 95% threshold, entering the “overwhelmingly positive” territory. In 2024 we also continued to develop other projects set in the Cyberpunk universe: among others by announcing another animation project slated for release on the Netflix platform, as well as preparing the game for its debut on Nintendo Switch 2, which is scheduled for June 5th, 2025.

We invite you to familiarize yourselves with documentation summarizing our financial results and key business developments at the CD PROJEKT Group in 2024, posted on our corporate website at www.cdprojekt.com under the Results Center tab.

Expressing an opinion concerning the CD PROJEKT S.A. Supervisory Board report on remuneration of members of the Management Board and Supervisory Board in 2024

According to the provision of the Commercial Companies Code (Art. 395 § 21), the General Meeting is required to adopt a resolution expressing its opinion with regard to the CD PROJEKT S.A. Supervisory Board report on remuneration of members of the Management Board and Supervisory Board.

We invite you to familiarize yourself with the Report, which is available on the Company's [corporate website](#) under the "General Meeting" tab.

Approval of the Supervisory Board annual report for 2024

The need to vote on approving the Supervisory Board report for 2024 arises in connection with the Company's compliance with principle 2.11 of the [Best Practices for WSE Listed Companies, 2021 edition](#).

In line with the aforementioned principle, the Supervisory Board of CD PROJEKT S.A. prepares and submits to the Ordinary General Meeting an annual report covering the given financial year. The reports contains, among others, information regarding the composition of the Supervisory Board and its committees, identifying members which meet independence criteria, along with a list of activities undertaken by the Supervisory Board during the given year.

We invite you to familiarize yourself with the CD PROJEKT S.A. Supervisory Board report for 2024, which is part of the documentation submitted to the General Meeting, and can be found on the Company's [corporate website](#) under the "General Meeting" tab.

Authorizing the Management Board to carry out buy-back of Company shares to facilitate exercise of entitlements assigned to participants of the first stage of Incentive Program A and creating a supplementary capital for this purpose

The decision made by the Management Board to submit a request to the General Meeting for authorization to conduct a share buyback is related to the planned vesting of the first stage of Incentive Program A for the years 2023-2027, in the framework of which the first group of entitled employees will, in the middle of the coming year, be offered CD PROJEKT shares for purchase at their nominal value. The Company wishes to retain the ability to extend an offer to participants to purchase shares which it will have previously bought back on the open market. This is one of the options for the implementation of the Incentive Program provided for by its Regulations, next to issue of new shares.

In line with Current Report no. 7/2025 the Management Board has applied to the General Meeting to authorize buy-back of Company shares on the following conditions:

- the total number of shares to be purchased by the Company shall not exceed 89 601,
- the price per share may not be lower than 1.00 PLN nor higher than 450.00 PLN,
- the total amount allocated by the Company towards this buy-back shall not exceed 40 320 450.00 PLN.

Updating the description of the Company's areas of business activity

The change in the description of the Company's business activity stems from the need to align this description with the recently issued Council of Ministers' Regulation of 18 December 2024 concerning the Polish Classification of Business Activity (PKD).

Approving changes in resolutions related to Incentive Program B

The proposed change in Incentive Program B for the years 2023-2027, approved by the General Meeting of CD PROJEKT in 2023, is to increase the total number of entitlements assignable to participants of Incentive Program B to 4 100 000 (four million one hundred thousand), which is 600 000 (six hundred thousand) more than is currently the case.

In addition, the resolution caps the aggregate number of entitlements assigned to participants under Incentive Programs A and B at its existing value of 5 000 000 (five million). As a result, any increase in the number of entitlements assigned under Incentive Program B (where exercise of entitlements depends on fulfilling the loyalty condition, the earnings

condition and the market condition) above the current limit would require a commensurate decrease in the number of entitlements assignable under Incentive Program A (whose exercise is contingent solely on fulfilling the loyalty criterion).

The need for the proposed change stems from the intent to more broadly apply the tools offered by Incentive Program B in terms of incentivizing key team members to pursue ambitious financial and market goals. This is of key importance for achieving the ambitious long-term development and publishing plans of CD PROJEKT, and is therefore consistent with the long-term interests of Company shareholders'.

Given that the additional entitlements introduced in the framework of Incentive Program B may not be assigned to Members of the Management Board of the Company, the total number of entitlements available to Members of the Management Board under Incentive Program B will remain unchanged.

In the Company's opinion the proposed change is in the shareholders' interest due to the fact that increasing the number of entitlements assigned under Incentive Program B, coupled with non-assignment of the corresponding number of entitlements under Incentive Program A, would have the following effect:

- exercise of a larger portion of entitlements will be subject to fulfilling the earnings and market criteria along with the loyalty criterion (Incentive Program B) rather than just the loyalty criterion (Incentive Program A);
- the total number of entitlements assignable in all existing incentive schemes remains unchanged (at 5 000 000 entitlements);
- the proposed changes do not increase the number of entitlements assignable to Members of the Management Board of the Company (which was set at 1 750 000 in previous resolutions), meaning that any additional entitlements in Program B will be assigned to key employees whose involvement and motivation are a prerequisite of achievement of ambitious business goals by the Company.

Amending the Company's Articles of Association by identifying the Supervisory Board of the Company as the body authorized to perform selection of audit firms for attestation of sustainability reporting

Currently the Supervisory Board of CD PROJEKT S.A. is empowered to select the auditor to be contracted to perform audits of the Company's financial statements.

The proposed amendment to the Company's Articles of Association would expand the competences of the Supervisory Board to cover sustainability reporting, the purpose of which is to maintain a coherent division of corporate responsibilities between the official bodies of CD PROJEKT S.A.

The proposed solution significantly streamlines the auditor selection process and increases its effectiveness. It is also solution is also consistent with established practices on the Polish capital market, and has been widely adopted by Polish companies traded on the Warsaw Stock Exchange.
